Subject: Red Hill Issues

Hello Keith-

I hope you are staying well. I'm reaching out because it seems that our teams are not on the same page when it comes to how we express our concerns to the Navy in our joint letters. Specifically, I am currently referring to the Agencies' response to the Navy's letter regarding the Destructive Testing report and the draft TUA response letter that is currently in very draft form – however this concern applies to the environmental work as well. It seems that much of the disagreement has to do with how the AOC is interpreted and the specific language HDOH believes must be used in our letters. In addition, I have observed that there is an expectation that complex analyses will result in all experts coming to complete agreement with respect to interpretation of the data. Based on my experience in numerous cleanup actions, that is rarely the case – however we must find a way for the project to move forward, even if interpretations vary.

Because I believe legal discussion around the language in the AOC is required, I'd like to suggest that we hold a few meetings that include myself, Lene, Steve L, Fenix and our respective attorneys.

I'm looking for your support of these meetings and would like the opportunity to talk with you over the phone. I know you have a lot to handle right now, so I thought first sending an email outlining my concerns prior to speaking would be most productive.

Please let me know a good date/time for you to talk and I will reach out.

Thanks much. Enjoy your weekend.

Nicole

Nicole G. Moutoux
